

SELECTED PUBLICATIONS

Agent Learning via Early Experience ICML 2026

- Second author; collaborated with Meta Superintelligence Labs and The Ohio State University.

VisCoder2: Building Multi-Language Visualization Coding Agents. ICLR 2026

- Co-first author (third listed); collaborated with University of Waterloo.

RESEARCH EXPERIENCE

I work on LLM agents for real-world software and coding workflows, covering post-training, model evaluation/benchmark design, and practical system building.

University of Waterloo Aug 2025 – Present

Research Intern, TIGER Lab, Waterloo, ON, Canada. Advisor: Prof. Wenhui Chen

- Owned data curation and training setup for multi-language visualization agents, including executable-task protocols and iterative self-debug settings.
- Designed and implemented a cross-language visualization image-generation workflow (e.g., R and C++), and co-developed a benchmark-oriented evaluation pipeline for generation quality, execution reliability, and error analysis.
- Currently working on two Software Engineering (SWE) agent research projects at UWaterloo (manuscripts in preparation), focused on agent reliability and end-to-end software task completion in realistic coding workflows.

The Ohio State University June 2025 – Present

Research Intern, Remote. Advisor: Dr. Kai Zhang

- Worked on experience-driven agent learning methods that improve policy quality without relying solely on expert demonstrations.
- Contributed to strategy design and empirical evaluation across diverse environments, with improvements in effectiveness and out-of-domain generalization.
- Currently leading exploration of agent learning methods that improve code-task performance without external data, while enhancing effectiveness in real-world SWE environments.

Academic Service

- Reviewer: ICLR 2026, ACL 2026

INDUSTRY EXPERIENCE

Weixun Nairui Intelligent Technology (Hangzhou) Co., Ltd. (Startup) Aug 2023 – Aug 2024

Team Leader / Full-Stack Engineer, Technology Department

- Led end-to-end system development across robotic-arm control, vision capability, PLC control, power circuitry, Linux/Qt interface, and database; deployed in 3 factories reducing workload by 60-80%.

Nokia Shanghai Bell Co., Ltd. Aug 2021 - Feb 2022

Embedded Software Engineer, NSB MN RAN R&D L1 Department

- Implemented and tested 5G/NR L1 kernels (e.g., FFT, MIMO) on ASIP prototypes, and contributed to x86 → ARM migration/optimization using NEON and memory-cache tuning.

Tuya Inc. (NYSE: TUYA) Dec 2019 - Jul 2020

Embedded Software Engineer Intern, Software Development Department

- Contributed to IoT SDK development and deployment for Wi-Fi/Bluetooth/Zigbee products.

EDUCATION

Western University Sep 2024 – Aug 2025

- Master of Engineering, Electronics & Communication Engineering

Hangzhou City University Sep 2016 – Jun 2020

- Bachelor of Engineering, Communication Engineering
- First Prize (2018) and Third Prize (2019) TI Cup National Undergraduate Electronic Design Contest.

SKILLS

- Languages: PTE Core full scores (90/90/90/90), TOEFL (98)
- Research Skills: LLM Training & Post-Training, Agent Evaluation & Benchmarking & System Development, Research Engineering Infrastructure
- Programming Skills: Python, C/C++, Bash/Shell, Git, Assembly, MySQL, DevOps (PVE, Linux, Docker).
